## Thomas Grey Shelter

This canopy style cycle shelter is a premium quality steel shelter that can be manufactured to suit any installation site. This shelter's large overhead canopy means that your cycles will be well protected from the rain and with the additional space covered this shelter may even serve as a public waiting area, buggy shelter or motorbike shelter.

The materials used in the shelter are some of the strongest available in the construction of steel shelters. The frame is made from a highly durable carbon steel and the cladding is typically a 5mm transparent PET material with exceptional shatter, fire and vandal resistance. The capacity of this shelter can vary depending on the type of cycle racks installed.

### Free Quotations and General Enquiries

If you are unsure about the type of racks you need then feel free to contact us and we will be happy to discuss your options.

Sizes (m) *	Capacity	Fixing	Frame	Cladding

\* Showing standard sizes only: Our cycle shelters can be custom built to any size

**Features:**  
 Ideal for car parks and public waiting areas.

Wide 4m canopy shelters a larger surface area than conventional cycle shelters of similar length.

Modular design: can be built up in sections to any size.

Paint can be colour matched using RAL or BS colour charts.

Versatile design can be adapted to house bikes, motorcycles and scooters, or combined as a public waiting area.
