TRINITY STYLE CANOPY

The Trinity style canopy was developed to act as both a play area canopy and an outdoor classroom as well as a parent waiting shelter. Unique features of the shelter include 90% UVA protective cladding, a spacious and adaptable design incorporating a range of shapes and styles, and a low maintenance easy clean roof. Teachers using the shelter as an outdoor learning environment have reported that children are more engaged and look forward to outdoor lessons under the shelter. As a result children become more involved in learning activities and maintain their attention for longer during lessons.

Variations

The shelter can be clad in a range of colours, and paint can be colour matched free of charge to create a fun learning environment for your pupils.
