- Colour: Green (RAL 6001)
- Finish: Powder Coated
- Cladding: 5mm Clear Transparent PET
- Fixing: Concrete pockets - safety bolted
- Frame: Mild carbon steel
fully welded end frames

SECURE CYCLE COMPOUNDS

These secure cycle compounds are based on our Chelsea range of cycle shelters. The addition of gates and a walkway cover to the shelters makes them much more appealing to the cyclist and as a result the shelters will be used more frequently.

Variations

These compounds are available in a range of colours and claddings and can either be bolted to a concrete base or subfixed in concrete depending on the existing surface. All our compounds are made from mild steel and can be powder coated or galvanised for added durability. Due to the modular design, the shelters can be built to any size or specification.

Free Quotation and General Enquiries

Our in-house design team will be happy to customise the shelter at no additional cost. For more information either contact us by telephone, email or through our website.

Sizes (m) *	Capacity		Fixing	Frame	Cladding
