 Fixing: Full concrete base
 Safety bolted base plates
 Frame: Mild carbon steel
 fully welded end frames

DANIELLE CYCLE SHELTER

New to the 2009/2010 season's range, the Daniella cycle shelter is the perfect choice if you are looking for a mixture of style and functionality. The shelter also offers good spatial economy due to the large surface area of the canopy section.

Variations

The Daniella shelter is available in a variety of shapes and styles to suit your requirements and can be supplied with or without the inner cycle racks. As with all our products, the cycle shelter is a modular design and can be built to any size or specification. The cycle shelters are typically covered in 5mm transparent PET, an extremely strong, fire resistant and UVA protective material, but can be clad with other materials if necessary (▼ see below).

Free Quotations and General Enquiries

If you do require steel plated or coloured PET then please contact us or visit our website for more information, a member of our design or sales team will be more than happy to assist you in making the right choice.
