 Cladding: 5mm Clear Transparent PET
 Fixing: Concrete base - safety bolted
 Frame: Mild carbon steel
 fully welded end frames
 Extras: Helmet lockers

SECURE GATED CYCLE SHELTERS

These gated cycle shelters are based on our Chelsea range of cycle shelters. The addition of gates to the shelters make them much more appealing to the cyclist and as a result the shelters will be used more frequently. The 2m width means that the gated Chelsea can be installed in areas where space is a consideration, and a full compound style may not be appropriate.

Variations

The gates can either be hinged swing or sliding (▶ see right). The gated chelsea is available in a range of colours and claddings and can either be bolted to a concrete base or subfixed in concrete depending on the existing surface. All our compounds are made from mild steel and can be powder coated or galvanised for added durability. Due to the modular design, the shelters can be built to any size or specification.

Free Quotation and General Enquiries

Our in-house design team will be happy to customise the shelter at no additional cost. For more information either contact us by telephone, email or through our website.

Sizes (m) *	Capacity Single	Fixing	Frame	Cladding
