 Fixing: Subfixed in C35 concrete
 Frame: Welded and bolted laser cut carbon steel structure (complies with BS5950 structural use of steel in buildings)

ENTRANCE / PARKING CANOPY

Product Examples

As well as our popular range of smaller entrance canopies, CAD Shelters also have the capacity to build much larger commercial and pedestrian canopies for hospitals, supermarkets and large complexes. As with all our products, our large canopies are designed, manufactured and installed by CAD Shelters. We oversee all aspects of the project and can therefore ensure the desired results from design through to completion.

Collaborative Projects

We have over 10 years experience working along side other design offices, architects and builders and are well equipped to work in conjunction with large building contractors on a wide range of large scale projects.

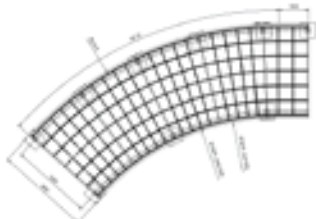

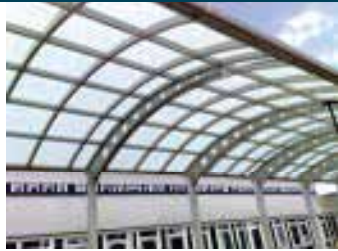

Standards and Regulations

Our shelters fully comply with British standards in the following areas: Structural use of steel in buildings (BS 5950); Hot-Dip Galvanising (ISO 180 1461); and Powder-Coating (BS 6497).
