

#### ▲ Lattice Style Canopy

Length: 30m  
 Width: 6m  
 Height: 4m  
 Cladding: 5mm Clear PET  
 Finish: Galvanised  
 Fixing: Subfixed in C35 concrete  
 Frame: Welded and bolted carbon steel structure  
 (complies with BS5950 structural use of steel in buildings)

## LATTICE STYLE CANOPY

The lattice style canopy is a well established and highly practical shelter suitable for a wide range of environments including car parks, playgrounds, hospitals and office complexes. The pitched roof design aids directional water run off and helps to make the canopy easier to clean and maintain. The high quality 100mm carbon steel used in the framework means that the canopy has a high tensile strength making it suitable for a parking area or areas with a high risk of damage. Galvanising of the entire shelter gives ultimate protection from bumps and scratches.

### Collaborative Projects

We have over 10 years experience working along-side other architects and builders and are well equipped to work in conjunction with large building contractors on a wide range of projects.

### Standards and Regulations

Our shelters fully comply with British standards in the following areas: Structural use of steel in buildings (BS 5950); Hot-Dip Galvanising (ISO 180 1461); and Powder-Coating (BS 6497).
